Georgia Days at the University of Bonn

October 27 and 28, 2022

Cooperation now and in the future

The University of Bonn cooperates closely with three Georgian universities: Tbilisi State University (Physics and Political Science), Tbilisi State Medical University (Human Medicine/Global Health) and Ilia State University (Biology). Two new scholarship projects have been secured in collaboration with the latter two in 2022 via the [Erasmus+ Worldwide Exchange Programme](#). In order to strengthen and further develop these partnerships, the University of Bonn is inviting eight researchers from Georgia and Armenia to Bonn, funded by the German Ministry of Education and Research (BMBF) through the Developing Higher Education

Cooperation with Eastern and South-Eastern Europe, South Caucasus and Central Asia grant program of the German Academic Exchange Service (DAAD).
